MONTHLY TRUCK TONNAGE REPORT

FOR IMMEDIATE RELEASE FROM STATISTICAL ANALYSIS DEPARTMENT
AMERICAN TRUCKING ASSOCIATIONS, INC. 2200 MILL ROAD ALEXANDRIA, VA 22314 (703) 838-1791

TONNAGE INDEX INCREASES IN OCTOBER

General freight carrier tonnage increased 10 points in October, 1984, from September, 1984 according to the ATA Truck Tonnage Index. At a level of 142.8 (p) with 1967 = 100, the October tonnage is 0.7 percent above September's 141.8(r). The current month's volume is 4.1 points (3 percent) above the tonnage level in October, 1983.

The actual tons reported by motor carriers in the ATA survey increased from 6.27 million tons in September to 6.73 million tons in October, 1984. Actual tons increased 7.3%. Adjustments for variations due to seasonality and the number of working (trading) days increased the October index level to 142.8(p).

From September to October, 1984, Industrial Production Index shows no change compared to the adjusted general freight tonnage index increases of 0.7%.

These findings were announced today by the American Trucking Associations, Inc. (ATA) Statistical Analysis Department. The monthly truck tonnage index is based on a survey of the companywide operations of Class I and II motor carriers of general freight. Index coverage represents in excess of one-half of the tonnage moved by this type of for-hire motor carriers of property subject to Interstate Commerce Commission regulation.

Month-to-month data are compiled using a chain link which, in turn, has been adjusted to remove the normal seasonal influence and variations due to differing numbers of business (trading) days each month.

The current and historic index numbers are shown on the reverse side, along with several other major business indicator series. A "three-month moving average" adjusted truck tonnage index has also been compiled which aids in smoothing out short term non-significant movements in the series.
